

EXPERIENCE

- Imaginnovate (FleetEnable)

Technical Lead (UI)

Visakhapatnam, India

Feb 2024 – May 2026

– UI Leadership:

Led frontend for a **drayage/freight SaaS** platform, managing a team of **10-15 engineers**

– AI Chatbot – RAG Pipeline:

Built AI chatbot using **LLMs, vector search, tool calling** for natural language config queries over thousands of options

– Architecture Modernization:

Migrated **monolith** → **microfrontends**, drove **Webpack** → **Vite + SWC**, reduced bundle size **70%**

– AI Agent Workflows:

Leveraged **Claude Code, Codex, OpenCode** for **3x** faster development; built **agent harness** with **TDD-supported** development workflows
- Imaginnovate (FleetEnable)

Senior Software Engineer / SDE 2

Visakhapatnam, India

Dec 2021 – Feb 2024

– Dashboards & Analytics:

Built daily orders dashboards using **Python, Dash, Plotly** with Airflow automation; delivered customer retention insights

– Frontend Development:

Developed features using **React, Redux, RTK Query** for FleetEnable’s core logistics platform

– Mentorship & Hiring:

Mentored **10+ developers** in React/Python; upskilled **10+ trainees**; conducted **100+ technical interviews**
- Coditude (previously VSH Solutions)

Software Engineer

Pune, India (Remote)

Jan 2021 – Dec 2021

– Chrome Extensions & Platform:

Built **Mail Tracker** extension (Redis, Python, Chrome APIs) and supply chain platform (**React, D3.js, Node.js, PostgreSQL**)

– Integrations:

Integrated **Stripe webhooks** and **Twilio** in Next.js applications
- Self-Learning & Freelance

Freelance Frontend Developer

2018 – 2020

– Fest Website – ECE Dept:

Designed and developed a college fest website for ECE department using **Vue.js** with **Razorpay** payment gateway integration

– Freelance Projects:

Delivered frontend projects using **React, HTML, CSS, JavaScript**; competitive programming on **CodeChef/HackerEarth**

EDUCATION

- ANITS, Visakhapatnam – B.Tech in Computer Science (Lateral Entry), 2017–2018

• SVGP, Tirupati – Diploma in Mechanical Engineering, 2014–2017

ACHIEVEMENTS

- Won 10-year anniversary hackathon – built **Logivision** using **Fluentd, Docker, Elasticsearch, Kibana** to visualize logs, detect faults, and monitor API speeds, replacing slow manual processes

• Awarded **multiple quarterly Best Performer** awards for consistent delivery and impact

PROJECTS

- **Euclidia Platform:** **AI-powered** educational content creation with automated video generation and narration using AI agents

• **Preciz Agent:** Personal AI agent with **tool calling, web search, scheduled routines**, and an **SDK CLI**

SKILLS

- **Languages & Frameworks:** React, Redux, Node.js, Python, GraphQL, MySQL, Redis, D3.js

Cloud & DevOps: GCP, AWS, Azure, DigitalOcean, Docker, Grafana

Tools: Vite, RTK Query, Airflow, Dash/Plotly, Playwright

AI & Architecture: Claude Code, Codex, OpenCode, LLMs, RAG Pipelines, Agent Harness, Microfrontends
